Amendments to the claims:

1. (Original) A bucket and removable lid construction comprising, in combination:

a bucket having a generally cylindrical side wall with an open top, said top including a first

radially outwardly extending, circumferential top rib, said top rib including a top side and an

underside, said bucket also including a second radially outwardly extending side rib vertically spaced

from the underside of the first rib and including a second rib underside; and

a lid including a center panel for covering the open top of the bucket, said lid further

including a peripheral, annular section with an outer depending skirt, said outer skirt including: a

first radially inwardly extending, locking flange for engaging against the underside of the bucket top

rib, said skirt further including a second radially inwardly extending locking flange for engaging

against the underside of the bucket second rib, said second locking flange spaced from said first

locking flange approximately the distance of the spacing of the bucket ribs to enable the first and

second locking flanges to retain the lid on the bucket, and said skirt further including a skirt

extension from the second flange, said skirt and skirt extension including a tear strip to permit

removal of portions thereof, said tear strip including portions of the first flange and second flange

which are permanently removed from engagement with the first rib and second rib respectively upon

removal of the tear strip, other portions of the first flange and the second flange remaining for

engagement with the first rib and the second rib respectively upon removal of the tear strip.

2. (Original) The combination of Claim 1 wherein the top of the bucket includes a

groove extending at least partially around the circumference of the bucket and the lid peripheral

section includes an inside face having a downwardly depending tongue for engaging said groove.

Banner & Witcoff, Ltd.
Ten South Wacker Drive

349282

Attorney Docket No. 10778.00020 Serial No. 10/722,169

3. (Original) The construction of Claim 1 wherein the tear strip includes an end tab for

manual gripping.

4.

(Original) The combination of Claim 1 wherein the bucket first rib includes an inside

wall and outside wall radially spaced outwardly from the inside wall, and said lid further includes an

inner hoop spaced radially inward from the outer skirt, said inner hoop and outer skirt respectively

engaging the inside wall and outside wall of the top rib.

5. (Original) The combination of Claim 1 wherein the bucket side wall further includes a

third radially outwardly extending side rib spaced from the second side rib and wherein the skirt of

the lid further includes a third radially inwardly extending flange for engaging the third bucket rib.

6. (Original) The combination of Claim 5 wherein the third bucket wall rib includes a

top side and the third flange of the skirt engages the third bucket rib top side.

7. (Original) The combination of Claims 1 or 5 wherein the lid flanges include inclined

surfaces, whereby placement or removal of the lid from the bucket is facilitated.

8. (Original) The combination of Claim 1 wherein the bucket and lid are molded plastic.

9. (Original) The combination of Claim 1 wherein the lid skirt is elastic.

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606

(312) 463.5000

349282

10. (Original) The construction of Claim 1 wherein the lid includes a depending inner

flange spaced from the skirt and sealingly engaged against the inner side wall of the bucket when the

lid is on the bucket.

11. (Original) The construction of Claim 1 wherein the lid includes at least a first circular

hoop spaced radially inward from the skirt and generally parallel to the skirt.

12. (Original) The construction of Claim 1 wherein the lid includes a first circular hoop

spaced radially inward from the skirt and a second circular hoop spaced radially inward from the first

circular hoop.

13. (Original) The construction of Claim 12 wherein the first circular hoop fits against the

inside wall of the bucket.

14. (Original) The construction of Claims 11, 12 or 13 including reinforcing fillets

connecting at least two of the hoops.

15. (Original) A container and removable lid construction comprising, in combination:

a container having a side wall with an open top, said top including a first outwardly extending top

rib, said top rib including a top side and an underside, said container also including a second

outwardly extending side rib vertically spaced from the first rib and having an underside; and

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606

a lid for covering the open top of the container, said lid including a peripheral, depending

outer skirt, said outer skirt including:

(a) a first inwardly extending, circumferential locking flange for engaging against the

underside of the container top rib,

(b) a second inwardly extending, circumferential locking flange for engaging against the

underside of the second container side rib, said second locking flange spaced from the first locking

flange approximately the distance of the spacing of the container side ribs to enable the locking

flanges to retain the lid on the container, and

(c) a skirt extension from the second locking flange, said skirt extension comprising a

tear strip of material from the skirt including selected portions of said first and said second locking

flange.

16. (Original) The construction of Claim 15 wherein the tear strip includes alternating

parts of the second locking flange and the skirt extension.

17. (Original) The construction of Claim 15 wherein the tear strip includes an end tab for

manual gripping.

18. (Original) The construction of Claim 15 in combination with a tongue and groove seal

between the lid and top side of the top rib of the container.

19. (Original) A bucket and removable lid construction comprising, in combination:

6

Attorney Docket No. 10778.00020

Serial No. 10/722,169

Ten South Wacker Drive Chicago, Illinois 60606 (312) 463.5000

Banner & Witcoff, Ltd.

a bucket having a generally cylindrical side wall with an open top, said top comprising a first

radially outwardly extending circumferential top rib, said top rib including a top side and an

underside, said bucket also including a second radially outwardly extending side rib vertically spaced

from the underside of the first rib and including a second rib underside; and

a lid for covering the open top of the bucket, said lid including a peripheral, annular section

with an outer depending skirt, said outer skirt including:

a first radially inwardly extending, elastically deformable circumferential locking flange for

engaging against the underside of the bucket top rib, said skirt further including a second radially

inwardly extending, elastically deformable locking flange for engaging against the underside of the

bucket second rib, said second locking flange spaced from said first locking flange approximately the

distance of the spacing of the bucket ribs to enable the first and second locking flanges to retain the

lid on the bucket, and said skirt further including a skirt extension from the second flange, said skirt

and skirt extension including a tear boundary to define a tear strip for removal from the lid, said tear

strip including portions of the first and the second flange which are permanently removed from

engagement with the second rib upon removal of the tear strip, other portions of the first and the

second flange remaining for engagement with the first and the second ribs respectively upon removal

of the tear strip.

(Original) The combination of Claim 19 wherein the top side of the first rib includes a 20.

groove extending at least partially around the circumference of the bucket, and the lid peripheral

section includes an inside face having a downwardly depending tongue for engaging and sealing said

groove.

Banner & Witcoff, Ltd. Ten South Wacker Drive

349282

Attorney Docket No. 10778.00020 Serial No. 10/722,169

21. (Original) The combination of Claim 19 wherein the bucket first rib includes an

inside wall and outside wall radially spaced outwardly from the inside wall, and said lid further

includes an inner hoop spaced radially inward from the outer skirt, said inner hoop and outer skirt

respectively engaging the inside wall and outside wall of the top rib.

22. (Original) The combination of Claim 19 wherein the bucket side wall further includes

a third radially outwardly extending side rib spaced from the second side rib and wherein the skirt of

the lid further includes a third radially inwardly extending flange for engaging the third bucket rib.

23. (Original) The combination of Claim 22 wherein the third bucket wall rib includes a

top side and the third flange of the skirt engages the third bucket rib top side.

24. (Original) The combination of Claim 19 wherein the lid flanges include inclined

surfaces, whereby placement or removal of the lid from the bucket is facilitated.

25. (Original) The combination of Claim 19 wherein the bucket and lid comprise molded

plastic material.

26. (Original) A bucket and removable lid construction comprising, in combination:

a bucket having a generally cylindrical side wall with an open top, said top including a first radially

outwardly extending, circumferential top rib, said top rib including a top side and an underside, said

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606

Serial No. 10/722,169

Attorney Docket No. 10778.00020

bucket also including a second radially outwardly extending side rib vertically spaced from the

underside of the first rib and including a second rib underside; and

a lid including a center panel for covering the open top of the bucket, said lid further

including a peripheral, annular section with an outer depending skirt, said outer skirt including: a

first radially inwardly extending, locking flange for engaging against the underside of the bucket top

rib, said skirt further including a second radially inwardly extending locking flange for engaging

against the underside of the bucket second rib, said second locking flange spaced from said first

locking flange approximately the distance of the spacing of the bucket ribs to enable the first and

second locking flanges to retain the lid on the bucket, and said skirt further including a skirt

extension from the second flange, said skirt and skirt extension including a tear strip to permit

removal of portions thereof, said tear strip including portions of the first flange and the entire second

flange which are permanently removed from engagement with the first rib and second rib

respectively upon removal of the tear strip, other portions of the first flange remaining for

engagement with the first rib upon removal of the tear strip.

27. (Original) The combination of Claim 26 wherein the top of the bucket includes a

groove extending at least partially around the circumference of the bucket and the lid peripheral

section includes an inside face having a downwardly depending tongue for engaging said groove.

28. (Original) The construction of Claim 26 wherein the tear strip includes an end tab for

manual gripping.

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606

Attorney Docket No. 10778.00020 Serial No. 10/722,169

29. (Original) The combination of Claim 26 wherein the bucket first rib includes an

inside wall and outside wall radially spaced outwardly from the inside wall, and said lid further

includes an inner hoop spaced radially inward from the outer skirt, said inner hoop and outer skirt

respectively engaging the inside wall and outside wall of the top rib.

30. (Original) The combination of Claim 26 wherein the bucket side wall further includes

a third radially outwardly extending side rib spaced from the second side rib and wherein the skirt of

the lid further includes a third radially inwardly extending flange for engaging the third bucket rib.

31. (Original) The combination of Claim 30 wherein the third bucket wall rib includes a

top side and the third flange of the skirt engages the third bucket rib top side.

32. (Original) The combination of Claims 26 or 30 wherein the lid flanges include

inclined surfaces, whereby placement or removal of the lid from the bucket is facilitated.

33. (Original) The combination of Claim 26 wherein the bucket and lid are molded

plastic.

34. (Original) The combination of Claim 26 wherein the lid skirt is elastic.

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606 (312) 463.5000 Attorney Docket No. 10778.00020

35. (Original) The construction of Claim 26 wherein the lid includes a depending inner

flange spaced from the skirt and sealingly engaged against the inner side wall of the bucket when the

lid is on the bucket.

36. (Original) The construction of Claim 26 wherein the lid includes at least a first

circular hoop spaced radially inward from the skirt and generally parallel to the skirt.

37. (Original) The construction of Claim 26 wherein the lid includes a first circular hoop

spaced radially inward from the skirt and a second circular hoop spaced radially inward from the first

circular hoop.

38. (Original) The construction of Claim 37 wherein the first circular hoop fits against the

inside wall of the bucket.

39. (Original) The construction of Claims 36, 37 or 38 including reinforcing fillets

connecting at least two of the hoops.

46. 40. (Currently Amended) A container and removable lid construction comprising,

in combination:

a container having a side wall with an open top, said top including a first outwardly extending

top rib, said top rib including a top side and an underside, said container also including a second

outwardly extending side rib vertically spaced from the first rib and having an underside; and

11

Banner & Witcoff, Ltd. Ten South Wacker Drive Chicago, Illinois 60606 (312) 463.5000

Attorney Docket No. 10778.00020

a lid for covering the open top of the container, said lid including a peripheral, depending

outer skirt, said outer skirt including:

(a) a first inwardly extending, circumferential locking flange for engaging against the

underside of the container top rib,

(b) a second inwardly extending, circumferential locking flange for engaging against the

underside of the second container side rib, said second locking flange spaced from the first locking

flange approximately the distance of the spacing of the container side ribs to enable the locking

flanges to retain the lid on the container, and

(c) a skirt extension from the second locking flange, said skirt extension comprising a

tear strip of material from the skirt including selected portions of said first locking flange and the

entirety of the second locking flange.

41. (Original) The construction of Claim 40 wherein the tear strip includes alternating

parts of the second locking flange and the skirt extension.

42. (Original) The construction of Claim 40 wherein the tear strip includes an end tab for

manual gripping.

43. (Original) The construction of Claim 40 in combination with a tongue and groove seal

between the lid and top side of the top rib of the container.

44. (Original) A bucket and removable lid construction comprising, in combination:

Banner & Witcoff, Ltd.
Ten South Wacker Drive

349282

Attorney Docket No. 10778.00020 Serial No. 10/722,169

a bucket having a generally cylindrical side wall with an open top, said top comprising a first

radially outwardly extending circumferential top rib, said top rib including a top side and an

underside, said bucket also including a second radially outwardly extending side rib vertically spaced

from the underside of the first rib and including a second rib underside; and

a lid for covering the open top of the bucket, said lid including a peripheral, annular section

with an outer depending skirt, said outer skirt including:

a first radially inwardly extending, elastically deformable circumferential locking flange for

engaging against the underside of the bucket top rib, said skirt further including a second radially

inwardly extending, elastically deformable locking flange for engaging against the underside of the

bucket second rib, said second locking flange spaced from said first locking flange approximately the

distance of the spacing of the bucket ribs to enable the first and second locking flanges to retain the

lid on the bucket, and said skirt further including a skirt extension from the second flange, said skirt

and skirt extension including a tear boundary to define a tear strip for removal from the lid, said tear

strip including portions of the first flange which are permanently removed from engagement with the

first rib upon removal of the tear strip, other portions of the first flange remaining for engagement

with the first rib upon removal of the tear strip, said second flange being entirely removable with the

tear strip upon removal of the tear strip.

45. (Original) The combination of Claim 44 wherein the top side of the first rib includes a

groove extending at least partially around the circumference of the bucket, and the lid peripheral

section includes an inside face having a downwardly depending tongue for engaging and sealing said

groove.
